

DP Simulator at STC

Recently Mr Aart Korteland, (Chairman of the Royal Association of Dutch shipowners KVNVR) officially launched the new Class 1 and 2 Dynamic Positioning Simulator at the Wilhelminakade branche of STC B.V..

This simulator is an addition to STC's already impressive set of simulators. The specific feature of this simulator is that it has two consoles of both Kongsberg and Imtech. Both the simulator and the instructors are certified by the Nautical Institute.

The combination of training on various facilities for DP (Class 1 and 2) means real training on the job, or in other words, on board a vessel in deep waters, in pipe-laying areas and a diving support vessel. The new DP simulator will also be used in the regular Class B and Class A maritime training courses presented by the STC Group.
