

EC Type Cert for Navi-Radar 3000-I

Transas has received the EC Type Certificate for its Navi-Radar 3000-I from BSH, Germany. The company began developing its Navi-Radar 3000-I about two years ago and the product performs all the functions of radar and ARPA, whilst overlaying electronic charts and AIS targets on the radar picture. Navi-Radar is integrated with other Transas navigational products Navi-Sailor, Navi-Conning. The BSH Certificate resulting from a careful verification procedure confirms the product's full compliance with all the necessary international standards and regulations.
