

EIVA A/S to go Digital

EIVA A/S has announced that they have embarked on the integration of digital video equipment with their survey software packages.

NETmc Marine will supply the digital video equipment.

The integration will allow full control and management over NETmc Marines DVR Pro series of data recorders from EIVA's NaviPac and NaviScan software packages. This will make the EIVA range of software able to provide integrated navigation and full ROV sensor integration available in the one database.

Release dates for the EIVA integration is due in third quarter 2005.
