

FarSounder On-water Demos

FarSounder will be offering on-water demonstrations to interested parties on 3 April 2014 departing from Jamestown, RI, USA. On board of the R/V Cap'n Bert demonstrations of FarSounder's 3D, forward looking, real-time navigation sonar will take place to show the sonar's navigational and obstacle avoidance capabilities in deep and shallow water.

Engineering staff will be available to discuss both navigation and other applications for these sonar systems. [Contact FarSounder](#) to reserve a slot as space is limited. Demonstrations will be held throughout the day, departing at various times.
