

# Flying Start for Blue Pelican Associates

Blue Pelican Associates BV (BPA) is an engineering and consultancy firm, operating worldwide in the fields of maritime and civil infrastructure, environment, transportation and the (offshore) energy sector. BPA resulted from the merger of five independent engineering and consultancy firms, all of which have extensive and long-lasting global expertise in dredging and port development.

The partners in Blue Pelican Associates are:

- Wil Borst (Netherlands Dredging Consultants BV),
- Peter Hamburger (Hamburger Management BV),
- Dik Roukema (Delphi Consult BV),
- Gaby Schouten (Dutch Marine Engineering BV) and
- Michiel Westermann and Jaap Smit (Primo Consultants Rotterdam BV).

Headquartered in Rotterdam, The Netherlands, the company has representations in Trinidad & Tobago and in the USA.

BPA offers a wide variety of hydraulic-engineering related services. Although dredging technology and hydraulic engineering are the cornerstones of the company, know-how on coastal zone management, environmental and socio-economic services form an integral part of BPA's core assets.
