

# Focus on Communication at Maritime Simulation User Conference

The Kongsberg Maritime 2006 Americas' User Conference (UC2006), which took place from 2nd - 5th December in Orlando USA attracted over 50 users of Kongsberg Maritime simulation systems to several keynotes, based around a theme of increasing importance to training institutes in North America and worldwide: Return on Investment. The armed forces session of UC2006 was also venue for the introduction of a new database exchange program, which has been developed to enable co-operation and sharing of databases between [Kongsberg](#) Maritime's military simulation customers. The inaugural exchange was between the Royal New Zealand Navy and the Canadian Navy, who signed up to the program during the conference.
