

Framework for Offshore Survey Services

Offshore survey company UTEC, from its Italian office, has announced the award of a significant multi-year framework agreement with SBM Offshore (Monaco) to provide offshore survey and positioning services carrying its construction vessel fleet, initially covering operations on-board the OCV Normand Installer and the new-build DSCV SBM Installer.

UTEC CEO Martin O'Carroll said that the company supports marine contractors from strategically placed operational bases around the world. Its offshore team utilises refined processes coupled with appropriate equipment and solutions.
