

Fugro Pelagos, Inc. Gains ISO 9001:2000

Fugro Pelagos, Inc., an ocean engineering, surveying and mapping company based in San Diego, California, has been officially certified as ISO 9001:2000 compliant for the provision of offshore survey and positioning services and development of global positioning software. Quality Certification Bureau Inc. awarded the certificate to Fugro Pelagos in June 2004. The process of certification included a thorough examination and review of the company's business processes and operational procedures.

ISO certification represents a company commitment to meeting customer needs, understanding customer expectations and adding value with products and services, as well as continuously working to improve all aspects of the business. The ISO standards help to systemize day-to-day policies, procedures and resources.
