

# Fugro Sessions at Offshore Technology Conference

'Life of the Field' will be the theme of Fugro's technical presentations during the Offshore Technology Conference, to be held from 6 to 9 May 2013 in Houston, TX, USA. A variety of technical sessions will be conducted to showcase Fugro's geotechnical, survey, and subsea services along with recent projects.

Topics will include the following:

- Current and future deep water AUV innovations as well as the role AUVs will play in integrity pipeline inspection
- Pipeline routing capabilities and introduction of unique tools and novel methods of mapping the shape of the seafloor to model likely locations of future landslides
- New applications to deliver data to clients (such as video, 3D models, GIS, Remote Ocean Current Imaging System (ROCIS))
- Nearshore Acoustic Imaging and Post-Macondo Offshore Regulatory Changes
- Highlights of Fugro's Joint Venture Seafloor Geotec, LLC which combines offshore drilling with robotic seabed systems to enter the seabed drill marketplace
- Highlights of Fugro's Pemex campaign
- Subsea Tooling
- Subsea Imagery

Fugro will also have a display at Booth # 5023.

To register for a technical presentation, contact [Regan Burford](#) or call/text her at +1 713 9698456.
