

Geo-matching.com Adds Underwater Cameras

Geo-matching.com has recently added UnderWater Cameras to its broad spectrum of product categories. SubseaTech is the first supplier in this category with the UVS100RL. In addition to general specifications, detailed information is given about console hardware and camera characteristics connectivity.

[Geo-matching.com](http://www.geo-matching.com) is an independent geomatic and hydrographic product comparison website featuring detailed spec-based comparisons and user reviews for more than 925 products in 37 product categories. The website guides users through the maze of specifications and gives them the opportunity to compare products from different suppliers. They can also read other professionals' reviews in order to reach a balanced judgment before buying.

Just some of the categories on offer include ADCPs – Acoustic Doppler Current Profilers, GNSS Receivers, ROVs – Remotely Operated Vehicles, Hydrographic Processing Software, UAVs – Unmanned Aviation Vehicles, Sidescan Sonars, [USBLs](#) and Magnetometers.

Visit www.geo-matching.com to browse through the products, upload a product or leave a review. Feel free to contact herma.lenten@geomares.nl for more information.
