GIS Engine SDK

AvisMap has launched GIS Engine a SDK designed for custom GIS applications. It facilitates custom development of GIS solutions and applications. This SDK provides several ActiveX (OCX) controls which support Visual Basic, VB.NET, C#, Visual C++ and other ActiveX compatible programming languages, with Microsoft Visual Studio versions 6, 2003, 2005, and Express.

AvisMap Gis Engine Supports .NET via COM. The SDK is appropriate for the development of enterprise level, multi-user user GIS solutions using SQL database map layers. The SDK supports the storage and access of vector map and image data in three SQL database formats: a) the proprietary SDB file database b) SQL Server and c) Oracle and Oracle Spatial.
