

Greater Cooperation Between German and Benelux Societies

The Deutsche Hydrographischen Gesellschaft (DHG) and the Hydrographic Society Benelux (HSB, The Netherlands/Belgium) are intensifying their cooperation. This will result in an improved exchange of experience and a coordination of workshops.

The members of both societies will receive invitations for workshops organised in cooperation. In November last year, the German colleagues were invited for the HSB workshop 'Sound Technologies' and later this year, a joint workshop at MARIN in Wageningen, The Netherlands, is to be scheduled.

In 2013, a joint professional workshop in Papenburg will be added to the agendas.
