

# Hydro 17 Conference: Final Call for Registrations

The organising committee of the Hydro 17 Conference in Rotterdam, The Netherlands, has issued a final call for registrations for the rapidly approaching event. The conference on board the former cruiseliner SS '*Rotterdam*' will take place next week, from 14-16 November. The theme of this year's conference is 'Connecting 4D Future'.

An attractive high-quality programme (9 relevant topics) and a selection of special keynote speakers offer inspiration and food for thought (from looking upon mother Earth to getting submerged in maritime history). Announcement of the IFHS Student Award winner will take place during our conference dinner.

A broad range of international companies present their products and services in more than 30 stands located on two decks of this unique venue. Throughout the event workshops, commercial presentations and on water survey demonstrations can be visited.

Connecting for the future will kick-off at the Icebreaker Party on 13 November on board the SS *Rotterdam*. You can [register here](#).
