

Hydro04 Proceedings Available

Proceedings of its Hydro4 symposium in Galway last November attended by delegates from over 30 countries are now available from the International Federation of Hydrographic Societies, formerly The Hydrographic Society. They comprise 25 papers by leading specialists from Australia, Canada, Ireland, Netherlands, Norway, Slovenia, Sweden, UK and the US. Topics covered include Remote Sensing & Imagery, Charting, Data Analysis, Processing, Systems & Applications, Environmental Monitoring, and Coastal Surveys. There is also an historical review of early hydrographic developments, by Sir Tipene Oâ€™Regan of the University of Canterbury, New Zealand.
