

Hydromapping with an AC-ROV 100

Bibby HydroMap have recently used the [AC-ROV 100](#) supplied by Holdfast Marine Solutions Ltd, UK, to carry out visual inspection of seabed conditions along a number of survey corridors in some highly challenging coastal environments.

The company spokesman expressed to have been very pleased with both the quality of the supplied equipment and also the level of service and support provided. The level of support and flexibility provided by Holdfast Marine Solutions with respect to the provision of and maintenance support for the ROV was experienced as impressive. The image quality acquired by the AC-ROV 100 has also been highly suited to the needs to accurately image the seabed for construction purposes.
