

HYPAC MAX Version 2.12a Gold

Coastal Oceanographics Inc. has made available HYPAC MAX version 2.12a Gold, a hydrographic software package used for survey design, data collection, graphical editing, plotting, volume computations, surface modelling and contouring. Two of the changes in HYPAC MAX 2.12a Gold involve a new 3DTV Terrain Dredge Viewer Mode that allows real-time update of surface model while dredging or survey and the HYSCAN Side Scan Sonar Acquisition program.
