HYPACK 2008 Training Conference

The HYPACK 2008 Training Conference will be held at the Westin Savannah Harbor Golf Resort & Spa. The 3-day training from 6 to 9 January 2008 will cover all the aspects of single beam and multibeam hydrographic surveying and dredge management using HYPACK, HYSWEEP and DREDGEPACK packages.

Some of the new features in HYPACK 6.2B that will be demonstrated are Point Cloud editing tool, Sub-Bottom Profiling, Riegl scanning interface, MrSID and JPEG2000 background charts support. Additional features that will be presented are side-scan utilities for the conversion of HSX to XTF converter, GSF to HSX and HSX to GSF.

Exhibitors from software/hardware manufacturers, equipment resellers and service providers will be on hand in the exhibit hall or performing on-the-water demonstrations.
