

HYPACK 2016 Released

After a few weeks of final adjustments, Hypack has released HYPACK 2016. The software offers users cutting-edge technology that further aids them in attaining their required objectives. Some of the new features in HYPACK 2016 include: high-density laser data acquisition, multi-detect multibeam support, multi-day acquisition and processing, post-processed positioning

(PPK) in HYSCAN, SBET editing tool, many new exported reports to PDF, Support 4-channel magnetometers, dual head water column logging, sound velocity interpolation by position in MBMAX, TIN MODEL volumes features, CastAway CTD probe into HYSWEEP® survey and the Sound Velocity program and new marine search software package.

The latest features in HYPACK 2016 can be seen using the Ustream videos listed on [Hypack's website](http://www.hypack.com). Also, general information and downloads are available online.
