

# Indonesia Buys Triton Elics HydroSuite

Triton Elics International (TEI) announced that a TEI HydroSuite was installed aboard the Cinta Laut, a survey vessel managed by Departemen Kelautan dan Perikanan (DKP), the Ministry of Marine Affairs and Fisheries for Indonesia. The TEI Hydrosuite provides DKP with a single point source for all hardware, software, and support for multibeam acquisition and processing of SM2000 multibeam data. The TEI suite of software includes IsisBathy, TargetPro, BathyRT, BathyPro, DelphMap, and DelphNav. Mr. Harold Orlinsky, TEI VP of Hydrographic Systems, assisted the DKP with final system configurations and provided hands-on training to all scientists and technicians associated with the project.
