

International Coastal Atlas Network (ICAN) Report Published

The final report of the ICAN 5 Workshop, held in Ostend, Belgium, in September 2011 is now available for download. ICAN is a network of more than 40 organisations from around the globe at local, regional, national or trans-national level (Africa and Caribbean) who have developed coastal and marine atlases which are used in a variety of ways.

ICAN is always looking for new members and is open for inquiries from any organisations interested in either developing a coastal atlas for their region or sharing an atlas that they have already created.
