

ISO 14001:2004 Accreditation for Alnmaritec

Alnmaritec, the specialist boat building company based in Northumberland, was delighted to announce that it has achieved formal accreditation of its Environmental Management system to the internationally recognised ISO 14001:2004 standard. The accreditation was given by Lloyd's Register Quality Assurance (LRQA) after an eighteen month process of system development and audits.

LRQA stated 'We would like to congratulate your company on successfully achieving approval to ISO 14001:2004.

Commenting further Alnmaritec Managing Director Chris Millman stated 'We are absolutely delighted to have achieved this accreditation of our Environmental Management System; it is very important for us as a company to be able to demonstrate that our systems comply with the very highest standards. We have already been accredited to ISO 9001:2008 standards for our Quality Management system and OHSAS 18001:2007 for our Safety Management System and in now having achieved accreditation of our Environmental Management System to ISO 14001:2004 I am proud to say that this puts us amongst only a very small number of SME companies to be accredited to all three standards'.
