

# iSURVEY Awarded Major Contract with Maersk Oil's Danish Business Unit

Following an eight-year relationship with Maersk Oil, iSURVEY has been awarded a survey and positioning contract with the international oil and gas company. Commencing in March 2017, the four-year contract, which has the option to be extended by one 12-month period, saw iSURVEY named as the nominated first caller contractor for survey and positioning services.

iSURVEY will specifically support Maersk Oil's Danish business unit with rig move operations in the Danish sector of the North Sea. The contract may also involve the mobilisation and demobilisation of a rig outside the Danish Sector, as well as potential rig positioning services over a subsea well.

iSURVEY is showcasing its service offering and expertise to the industry during Ocean Business 2017, from 4-6 April in Southampton, on stand K10.
