

Ixsea Oceano Wins ISO 9001:2000

Ixsea Oceano has been awarded ISO 9001:2000 certification by BVQI (Bureau Veritas Quality International). The certification includes engineering, sale, manufacturing and support for all Ixsea Oceano product lines (inertial navigation systems, gyrocompasses, acoustic releases, magnetometers, acoustic positioning systems) at their main plants in Brest and Marly-le-Roi.

An internal quality system was already in place for engineering and production.
