

IXSEA wins prize at Balt-Military-Expo 2006

IXSEA won the 'Amber Medallion' in the Rear Admiral Xawery Czernicki Grand Prix at Balt-Military-Expo 2006 in Gdansk, Poland in early June for MARINS inertial navigation system. Designed to meet the demands of the navy for more accurate INS, MARINS can be used onboard corvettes, submarines, aircraft carriers and navy test vessels. Its performance and quality have passed the space quality grading standards.
