

Janelle Pence Seatronicsâ€™™ New Vice President USA Region

Seatronics Ltd, headquartered in the UK, has appointed Janelle Pence as vice president for the USA region. She will be responsible for managing and developing Seatronics' business with a particular focus on developing long-term partnerships with the remotely operated vehicle (ROV) and survey community in the Gulf of Mexico.

Janelle Pence has more than 14 years of experience in the offshore oil and gas industry, with a substantial focus on subsea development. She has held leadership positions in business development, commercial management, strategic planning and general administration with both Subsea 7 and Ceona, and holds a BBA in marketing from Texas A&M University and an MBA from Rice University in the USA.
