

Jeppesen Launches Marine Business Unit

Jeppesen, a Boeing subsidiary and a provider of aeronautical data, announced the launch of Jeppesen Marine, its newest business venture. The new business unit leverages Jeppesen's 70-plus years of experience in the aeronautical information business to provide the commercial marine market with similar digital navigation and information solutions.

Jeppesen Marine has been chartered with the same underlying values that launched Jeppesen in 1934—improving safety and efficiency through innovative navigation solutions. Because aviation and marine share many of the same challenges, Jeppesen is in a strong position to bring proven technologies and solutions from the highly advanced aviation markets to marine markets.
