

Klaipeda Seaport Takes ELAC Multibeam

ELAC Nautik has recently delivered and successfully integrated a complete hydrographic solution, S/V VARUNA, to Klaipeda State Seaport Authority (KSSA). KSSA now operates two shallow water systems SEA BEAM 1185. The system is designed for both high-accuracy harbour and near shore surveys and offers the newest Coastal Oceanographics software solution with high precision Aquarius DGPS/ RTK positioning system and MAHRS motion sensor/ gyrocompass. A Valeport CTD guarantees reliable water profiles.
