

# Kongsberg Maritime Germany Open for Business

Kongsberg Maritime is opening a new subsidiary in Germany. Kongsberg Maritime GmbH will be operational from January 2005 and has been set-up to provide local support for Kongsberg customers.

With a local office customers have easier access to the Kongsberg Maritime network for new systems and service and support. Kongsberg Maritime GmbH will place special emphasis on assisting the expanding German retrofit market and the advantage of the Kongsberg system upgrades within it.

Kongsberg Maritime GmbH is co-operating closely with the Kongsberg Maritime service company in Rotterdam, and will through this offer a complete support package for German clients in all areas including yards, ship management and new building departments.
