

MacArtney Supplies SubConn Connectors for Deep Ocean Research

An order for MacArtney SubConn connectors and straps has just been placed by Nautilus Marine Service GmbH, Germany. The scope of supply comprises 2,000 LPBH5M and 2,000 LPIL5F SubConn connectors as well as 2,000 LPA straps. The SubConn connectors are to be used for deep-sea flotation and instrument housings for deep ocean research.

They represent the second placement of order made by Nautilus Marine Service with MacArtney within a short period of time. It is a multi-annual order which means that the overall contract comprises a repeat order for the same quantity of connectors and straps for delivery in 2018.
