

# Magnetic Survey System Sold

Innovatum Ltd. has sold a SMARTSEARCH 12 sensor magnetic survey system to Equipment rental company Dynamic Positioning Services Ltd of Aberdeen (UK). The SMARTSEARCH unit has been deployed immediately to a project in the Baltic.

The SMARTSEARCH is a complete magnetic survey unit which may be used for detailed data gathering in support of route surveys, UXO & munitions clearance, wreck location and archaeological survey. SMARTSEARCH may be carried by any medium sized (small work class) ROV, towed sleds or surface vessels.
