

# Malaysian Positioning Contract

Veripos has been awarded a new three-year contract by Kuala Lumpur-based Orogenic Geoexpro for continued provision of GNSS positioning services to the Malaysian company's fleet of vessels engaged on geophysical surveys, rig moves and major construction support projects throughout Southeast Asia.

Services provided by Veripos under the contract include a combination of its dual-beam standard and ultra Precise Point Positioning (PPP) facilities supported by shipborne hardware comprising 30 LD3SG1 and 10 LD3G2 integrated mobile receivers. Also available is a series of proprietary software modules for real-time monitoring, control and QC operations.
