

# Mapping Software Training Partnership

Highland Geo Solutions, Canada, has entered into an agreement to becoming EIVA Training Partner. Highland Geo Solutions specialises in survey solutions for marine and terrestrial mapping projects. In the future, the company will be offering EIVA software training courses in Canada and other selected areas as well.

Graham Nickerson, general manager at Highland Geo Solutions finds that EIVA's software toolbox addresses various survey acquisition and processing requirements of clients, worldwide. Highland Geo Solution's survey mapping team supports this software and its users with qualified and experienced training facilitators.

The first training course - where Highland Geo Solutions will feature EIVA - will be at a Seafloor Exploration Training Course, taking place in September 2013, in Malta.
