

Marine AED

Sudden Cardiac Arrest (SCA) is said to be the main cause of death on ships. Incredibly, despite the fact that there is a treatment for SCA, few companies currently own the equipment that can save a victim on-board. Martek's™ Lifeforce Marine Automated External Defibrillator (AED).

The world's first and only type approved AED specifically designed for use on-board ships. Lifeforce is type approved by Germanischer Lloyd, under their industry leading 'Medcerts' programme. The device has a battery that lasts for five years and is portable and lightweight. It is designed robust so to withstand hostile conditions.
