

# Maritech Certified for Hypack Training

The Maritech Group has recently been endorsed by Coastal Oceanographics Inc. to conduct certified training on the Hypack Max software product. Courses will be conducted at the Maritech Marine Survey & Geoscience Training Centre located at the Beacon Innovation Centre, near Gt. Yarmouth. Certification took place during the recent Hypack 2003 Seminar organised by Coastal Oceanographics Inc. and Del Norte Technology Ltd. The course covered a thorough examination of the Hypack Max hydrographic and data processing software, including an overview of the Hysweep and Dredgepack products. Although initially certified on the Coastal principle product, it is hoped that Maritech will also gain training certification on the Hysweep and Dredgepack software products in the near future.
