

MCS ROV Inspection Software â€™ROV Commander R3â€™™

MCS, the Supplier of Software Solutions for the ROV Inspection Surveys have released their latest version of the ROV Pipeline Inspection Software 'ROV Commander R3'.

The new Release includes:

- Digital video Recording & Display Functionality
- Eventing module
- Enhanced Data Logging, Processing & Charting Functionality
- 'ROV Commander Viewer' Software for Inspection Data Review by the End User
- More User Friendly Interface

This release will consolidate all the ROV Inspection Functionalities from Data Logging, Navigation & Scans Processing, Eventing, up to Charting, Reporting & Digital Video Archiving. ROV COMMANDER will be the preferred choice for:

- ROV Pipeline and Cable Inspection
- Pipeline Pre and Post trenching survey
- Pipeline and Cable Post lay survey
- ROV Platform Inspection
- Debris clearance survey

That would make a change in the way a Typical ROV Survey job data is handled; from being a multi-platform task to become a single integrated production line.

It's about time to deliver the survey outputs in Digital Media & Web GIS Applications for robust data accessibility.
