

# Metoc Sells Stake in SeaZone Solutions

Metoc plc has confirmed an agreement with UKHO, the UK Hydrographic Office, on the sale of Metoc's majority shareholding in SeaZone Solutions Ltd., which is now 100% owned by UKHO.

“It’s been invaluable collaborating with the UKHO on SeaZone over the last 2 years,” says Metoc managing director Kevin Deeming.

From time to time, Metoc will continue to work with SeaZone, which delivers UKHO Hydrospatial and other UK and overseas agencies’ data to the worldwide Geographical Information (GI) market. It also provides enabling tools, and consultancy and training services to support the use of coastal and offshore environmental data in Geographical Information Systems (GIS), CAD and other systems.
