

MMT Expands Business with New Survey Vessel

During the past year MMT have gained a good market position and in order to keep developing have taken important steps to continue to grow their business, including chartering a new vessel, *M/V Olympic Delta*, and investing in the *Surveyor Interceptor no 2*. Both initiatives are set to expand the company's possibility to meet increased demand for their services.

MMT have chartered the DP 2 survey/IMR vessel *M/V Olympic Delta* on a long-term contract with the Norwegian ship owner Olympic Subsea ASA. Olympic Delta is an environmental friendly vessel and is one of the most modern and advanced ships in its segment. MMT will use the vessel for ROV Survey services and the first project will be in Biscay.

The investment in a new *Surveyor Interceptor* will increase MMT's capacity to their customers, to bring the revolutionary technology and services that this new concept represents. The investment in *Surveyor Inceptor* is together with partner Reach Subsea.

MMT's CEO Stefan Eliasson said this expansion is an important milestone for the company. With these new platforms MMT will maintain their position as the technical forefront marine survey company for the offshore industry, Eliasson believes.
