

MMT Shares 3D Modelling of Wrecks during Shallow Survey

With almost 40 years'™ experience of hydrographic surveys, MMT will showcase its latest techniques during Shallow Survey 2015. A particular highlight will be the company's presentation on Tuesday 15 September 2015 at 15:45h on 'The generation of 3D models from multibeam & laser data for structural monitoring of wrecks'™. This is one of the sessions of the Shallow Survey event, which is being held from 14-18 September 2015 at Plymouth University, UK.

MMT is also one of the sponsors of the 'Taste of the West food and drink trail' on Wednesday 16 September at 17:00 hrs. Attendees are welcome to this event.

The United Kingdom Hydrographic Office and the Maritime and Coastguard Agency will host [Shallow Survey 2015](#) and a number of associated events in Plymouth, Devon, United Kingdom, from 14-18 September 2015 at Plymouth University facilities.
