

MMT UK Awarded with Civil Hydrographic Programme Extension

Following the first 3 years of successful hydrographic survey, MMT UK has received a further 2-year contract extension with the Maritime & Coastguard Agency's Civil Hydrographic Programme (CHP).

This is the second time MMT UK has been awarded an extension following a successful first three years. MMT UK is contracted to survey the medium to deep CHP work in UK waters.

MMT UK is known for its high-quality data and for conducting the *SS Richard Montgomery* high definition wreck surveys using traditional survey methods combined with new laser techniques which has also been awarded to MMT UK each year by MCA. MMT will continue to provide high definition surveys for the CHP until 2018.

Martin Godfrey, project manager, MMT UK, said he is very pleased to be awarded the extension and to be one of MCA's preferred suppliers. MMT UK will continue to always deliver with the highest quality data and look forward to another two years of close cooperation with the MCA, he added.
