

# Mobile App for Hydrographic Contractors

A mobile application for Marine and Hydrographic contractors across the iPhone, Android and BlackBerry Playbook platforms has been launched by G.O.S.S. Consultants, UK. This recruitment application adds another level of functionality to the website that features real-time vacancies.

The app will enable contractors to keep up to date with roles that match their expertise and availability. Their member profiles can be updated from the app, the job applications will be tracked and the aim is for contractors to be informed immediately of the vacancy. This should result in a higher level of success being achieved in notifying people of suitable vacancies.

As one of the leading recruitment agency's for hydrographic and marine recruitment contractors, the new applications for iPhone, Android and Blackberry Playbook are targeted at helping contractors find and apply for specific roles. The applications are a perfect companion for the existing online profiles providing

- search for specific positions by keyword
- save keywords search terms for future reference
- see all current positions, both permanent and temporary
- receive push notifications of relevant positions
- apply for jobs instantly
- save jobs for future reference
- share jobs via email
- view GOSS Consultants profile
- set next availability date
