

Mobile Mounting Bracket for SeaBeam 3030

L-3 Elac Nautik can now supply a mobile transducer mounting bracket for the SeaBeam 3030 multibeam system with a spatial resolution of $3^{\circ} \times 2^{\circ}$. Normally, 30kHz systems can only be installed stationary. However, with this mounting bracket, L-3 ELAC Nautik offers the possibility to operate a 30kHz system in a mobile version.

The bracket is has a streamlined construction and guarantees best measuring results as well as a simple and optimal installation. It includes several interfaces for the connection of differential sound velocity profilers and motion sensors.
