

Multibeam Echosounder for North Carolina University

Seafloor Systems, USA, has delivered a Hydrolite-MB portable turnkey multibeam echo sounder system to the NC State University Department of Civil, Construction, and Environmental Engineering. The Hydrolite-MB incorporates a multibeam echo sounder and ancillary devices on a portable, pre-calibrated pole mount system.

The advantages include its lightweight design for ease of portability, pre-calibrated mounting of sensors, and its turnkey implementation, requiring no additional hardware or software to operate.
