

Multibeam Operator Training Course

MosaicHydro (Canada) has announced a 5-day Multibeam Operator Training Course offered in Sidney, BC (Canada) from 3 to 7 March 2008 at a cost of USD3200 per student.

The course intended for Surveyors new to Multibeam Echosounder Surveys and will include 27+ hours of in class training and 8 hours on a multibeam survey vessel.

Visit the website for complete course details and registration instructions. Space is limited to 9 participants and at this moment the course is half full.
