

# NACOS INS Retrofitted to QE2

A SAM Electronicsâ€™™ NACOS 35-4 integrated navigation system has been installed on the QE2, as part of a major three-week refurbishment project completed in May by Germanyâ€™™s leading repair and conversion yard, Lloyd Werft of Bremerhaven (Germany). The system, which replaces an earlier different navigation assembly, comprises three Chartradar 1000 units each combining radar and electronic charting in addition to integrated track control and conning functions, a Trackpilot, and two chartpilot 9330 for provision of planning, track and map data.
