

# Naval Sea Systems Contract for RD

RD Instruments has been awarded a second significant build-to-print contract for the Naval Sea Systems Command's™ Hydrographic Mapping Unit (HMU) system. This contract, with options, will be worth a total of approximately US\$ 4.5 M. HMU is a Diver Hand-Held Underwater Integrated Sensor and Navigation System used to conduct hydrographic reconnaissance. The fully integrated sensor and navigation system will be used to provide a more accurate and expedient method of collecting, recording, analysing, and transferring hydrographic reconnaissance data.
