

# Navico Inks Coast Guard Contract Through 2025

Navico, parent company to the Lowrance®, Simrad®, B&G® and C-MAP® brands has signed a 5-year agreement with the United States Coast Guard (USCG) to provide C-MAP cartography under the USCG's Small Boat Product Line (SBPL). Navico was selected for a competitive award by the USCG for products that met all of their technical needs. Navico prides itself on its superior consumer support, accuracy of data and overall level of service. Navico's C-MAP will deliver cartography cards to 300 different stations across America, twice a year.

The SBPL aligns all boat support resources under a single entity with authority and accountability for maintenance and logistics for all boats in the Coast Guard. Managing roughly 1,800 boats in 26 different classes (from 23-foot RIB's to the 47-foot Motor

Lifeboat's), equipped with navigation systems from Furuno and Raymarine, the SBPL boats are assigned to various units within the USCG, such as Maritime Safety and Security Teams (MSST), Coast Guard Stations, Maritime Law Enforcement Academy, and Aids to Navigation Teams (ANT).
