

New Agencies for HydroConsult BV

HydroConsult BV has been appointed agency for three companies.

Innovation 4C is the UK manufacturer of the 3D Motion Engine, a small, low-cost accurate motion sensor specially designed for the marine industry. The size of the unit is that of a small PCB card with three solid state gyroscopes, three accelerometers and three magnetometers, in combination with a temperature sensor.

NGK Ocean is the Japanese manufacturer of special underwater apparatus. Working depths of NGK equipment vary from near surface to 6,000m and typical equipment includes sensors (turbidity, quality), underwater release mechanisms (suspended or bottom-mounted), sediment traps, water samplers, underwater winches, ocean observation buoys, marine snow cameras and titanium underwater housings. MAPIX Technologies/NET mc Marine. This combination of UK-based software/hardware manufacturers brings various digital video systems to the market.
