

New Coda Systems Ordered

CodaOctopus Ltd has made an early sale of a bundle of Coda acquisition and processing systems to Andrews Survey, a supplier of survey and positioning services for the international offshore industry. The new package belongs to the Coda GeoSurvey Productivity Suite and was assembled by CodaOctopus together with Andrews Survey. It comprises a Coda DA50 Sidescan Sonar Windows-based acquisition system, Coda Replay 200 Windows-based post-processing software, Coda GeoKit Sidescan for geophysical interpretation and Coda Mosaic, delivering very high-resolution GeoTiff output.
