

New Mobile Mapping Platform

Positioning Resources introduces MobileMapper CE, the next generation handheld GPS mobile mapping device from Thales Navigation. The new MobileMapper CE offers features like sub-meter GPS positioning, integrated Bluetooth wireless technology, removable SD card memory, touch screen, field replaceable all day run-time battery and built-in alphanumeric keypad. Simple, rugged and affordable! An open-platform design with embedded Microsoft® Windows CE .NET, MobileMapper CE supports PocketGIS software which combine to provide an ideal field data capture solution.
