

New Veripos Appointments

Veripos has appointed Dr David Russell as Senior GNSS Technical Specialist with responsibility for product design and development as head of its newly-established GNSS Technical Group. A former Research Fellow at Nottingham University's Institute of Engineering Surveying & Space Geodesy (IESSG), he joins the company from Thales GeoSolutions with whom he was Technical Analyst involved in research and development of GNSS initiatives. He is a member of the Royal Institute of Navigation as well as the Institute of Navigation. Also appointed as GNSS Infrastructure Manager of Veripos's new Infrastructure Group with responsibility for implementation of new services in addition to management and enhancement of existing ones is Bobby Johnson. He likewise joins the company from Thales GeoSolutions with whom he was latterly Technical Manager of its Signals Division responsible for management of its SkyFix and Landstar DGPS networks together with their associated control centres.
